

Interior Mats Package

Autopia ↑

Muddy shoes, messy cargo, spills — covered.

Protect your car from muddy shoes, messy cargo and spills with our quality floor and boot mats — carpet, rubber or a mix, laser cut and fitted to your car's interior.

Laser cut for your exact model

Every mat is cut to a template for your vehicle, so it sits flush against the footwell and boot floor, clears the pedals and locates on the factory anchor points. No trimming, no bunching, no sliding underfoot.

Choose carpet, rubber or a mix

Carpet mats keep the cabin looking and feeling factory-fresh. Rubber mats have raised edges to trap water, mud and sand, and wipe clean in seconds. Many drivers mix the two — rubber where the dirt lands, carpet where it doesn't.

Boot protection that earns its keep

A fitted boot mat takes the punishment your boot carpet otherwise would — sports gear, pets, prams, tools and the occasional leaking bottle. Lift it out, hose it off, put it back.

- Muddy boots and sports kit
- Sand, gravel and grass clippings
- Pet hair, claws and accidents
- Spilt drinks and groceries
- Paint tins, tools and garden supplies
- Everyday scuffs from loading

Protects the interior you'll hand back

Factory carpet is expensive to repair and almost impossible to restore once it's stained or worn. Mats take the wear instead, which helps your vehicle present well at the end of your lease.

Bundled into your novated lease

Add your mats package when you order the car and it can be included in your novated lease, so it's covered by your regular lease payments rather than another out-of-pocket cost.

Custom laser-cut fit

Cut to a template for your exact make and model.

Carpet, rubber or mix

Choose the material to suit each part of the cabin.

Lift out and hose off

Raised edges trap water and grit until you clean them.

Material choices, boot liner availability and fitment vary by vehicle make and model. Speak to your Autopia consultant for the options available for your car.
